For this reason, Coca-Cola Hellenic is maintaining a Group-wide focus on driving improved cash flow generation over the 2009-2011 planning period, whilst continuing to seek out and maximise attractive growth opportunities.

To support this objective, Coca-Cola Hellenic intends to continue focusing on:

- Implementing cost reduction and restructuring programmes aimed at improving operational efficiencies.
- Optimising the efficiency of the Company's existing asset infrastructure, whilst undertaking a prudent capital investment programme where necessary to support our activities.
- Driving improvements in working capital.

Cumulative net capital expenditure over the three-year period from 2009 to 2011 is expected to be approximately €1.4 billion with free cash flow (cash flow from operations less capital expenditure) expected to be at least €1.2 billion over the same period.

The Company's strong cash flow generation is expected to enable us to maintain dividends within a payout ratio that has historically been 20-30% of comparable net income, with annual dividend per share increases.

Coca-Cola Hellenic benefits from a robust capital structure and good liquidity with no debt refinancing commitments until 2011.
