Comp. EBIT margin (%)	9.1	7.5	150bps

Revenue growth accelerated in the second quarter, up 5.7% for the first half on an FX-neutral basis and 5.6% on a reported basis

Focus on value delivery through a combination of category and package mix improvements as well as price increases, resulted in revenue per case growth by 4.3% on an FX-neutral basis with all market segments improving

Volume grew by 1.4% in the first half, with growth in all seaments

- Volume in the Established markets increased by 0.8%, with a good second quarter supported by the late Easter and a warm June
- Good growth in most of the markets in the Developing segment led to 0.8% volume growth
- The Emerging markets segment delivered 1.9% volume growth in the first half with good performances in Ukraine, Romania and Serbia

Operating leverage resulted in a 40 basis point reduction in comparable operating expenses as percentage of net sales revenue

Comparable operating margin increased by 150 basis points to 9.1%, benefiting from operating leverage despite adverse input costs and foreign exchange movements

Comparable earnings per share was €0.576 – a 38.5% increase on the prior-year period; basic earnings per share was €0.526 - a 35.9% increase on the prior-year period

We are delighted to report an excellent set of results for the first half of the year, with volume and revenue per case growth in all three market segments. It is also very pleasing to see the revenue growth translating into significant margin expansion. This demonstrates that our strategy to exploit our lean asset base and improve profitability through operating leverage is

"We are on track for broad-based revenue and margin growth for the full year with the organisation energised by the progress we are making towards our 2020 financial targets. 77
