Business drivers and strategic themes	Capturing the growth opportunities in our diverse geographic footprint with strong emerging market exposure Growing revenue faster than volume through revenue growth management initiatives Adding locally relevant still brands to our portfolio	Capitalising on the markets whose economies are recovering Restructuring programmes are largely complete, giving us operational leverage benefits as volumes grow	Adapting to the changing retail landscape Restructuring operations to achieve cost efficiency	Good prospects offered by the low consumption per capita and favourable demographics Increasing focus on restructuring efforts, particularly in Nigeria.									
Recent developments		Balanced improvement in volume and price/mix drives margins further.	Good revenue growth, with balanced improvement in volume and price/mix. Margins impacted by one-off expenses in the year.	Good volume growth in medium-sized countries supports volume growth despite marginal decline in Russia and Nigeria. Price increases boost margins in the absence of FX headwind in the year.									

"The evolution of our portfolio is gathering pace and gaining traction with customers across our markets. We have delivered a strong set of results as product launches and tailored commercial activation enabled us to capitalise on favourable market conditions and the FIFA World Cup. Revenue growth was excellent driven by both volume and price/mix improvements across all three of our geographic segments. Margins continue to improve as we keep our focus on driving top-line growth and cost control.
"We continue to make good progress against the 2020 targets and expect to deliver another year of revenue growth and improvement in margins."

Zoran Bogdanovic, CEO
