“ In 2018 we delivered another very good performance with revenue growth above our target range and another step up in margins. Strong volume growth in all our segments was helped by a record number of new product launches, whilst price/mix improved for the eighth consecutive year. This growth supported margin progress, which we delivered while increasing our investment in marketing. Our sharp focus on cost efficiencies continues while we invest in the business for growth. The shape of the business, capabilities and commitment of our people and our overall commercial proposition give us confidence in our ability to continue to grow revenues and margins. ”
