Climate and net zero

#NetZeroby40 roadmap for Scopes 1, 2 and 3

Scope 1: direct emissions in direct operations

Fuels used in manufacturing, by our own transportation fleet or in remote properties**

Scope 2: indirect emissions in direct operations

Purchased energy: electricity, used heat, steam, Combined Heat and Power (CHP) output Scope 3: indirect emissions up/ downstream

Packaging, ingredients, coolers, third-party transportation fleet

CO, reduction plan endorsed by SBTi on 1.5° pathway in 2021

-27% CO₂ 2020 vs. 2010

49% of coolers energy efficient in 2022

2024-2026 We will introduce renewable fuels for thermal energy

Accelerate packaging decarbonisation as of 2025

> -14% CO, 2030 vs. 2020

> > 3.7*

Baseline for our first Science Based Targets (2010). Those targets achieved two years ahead of the target year of 2020

Baseline for Science Based Targets as per 1.5 degree scenarios (2017)

From 2024 to 2039: Beyond value chain mitigation ***

Neutralisation of residual emissions from 2040

#NetZeroby40

-56% CO, 2040 vs. 2030 1.6*

- * Recalculation of all emissions made due to conversion factors change and according to the GHG Protocol Corporate Accounting and Reporting Standard.
- ** Remote properties warehouses, distribution centres or offices where there are Coca-Cola HBC employees but there is no manufacturing site (plant). *** As defined by SBTi.
